

I strongly oppose any future action the FCC might take to diminish the protection the Indiana Telephone Privacy Law provides to Indiana citizens. I personally have enjoyed my evening meals not being interrupted when I'm at home. Also a great benefit to me is the fact that when I'm traveling for business and I can call my home answering machine remotely and not have 10 or 12 hang ups wasting my cell phone time when retrieving messages. I also enjoy not getting calls early AM on week ends.
